DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The space for air could possibly cause a vapor lock to the inlet 25 and therefore, would be inoperative and since this is a venturi would there be an air space at all?

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-14 (as best understood) are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Mullick.

Mullick shows all of the basic device including a shower device having a first region 12, second 11, porting region 14, air space, third region 15, tube above 33a with inlet above, solution apparatus 30, point of dispersal 18, and reservoir

with aperture. In regard to claim 14, the first region is 11, the porting region is 14, and the second region is 15.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mullick. Mullick shows all of the basic device except for the second region being conical. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Mullick device to have the second region conical in shape since the shape would depend on the desired spray pattern desired (i.e. the force applied to the water).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lane is cited to show a shower device with a right angle.
